A FAIR TRIAL IN TERRE HAUTE.

The nineteenth century is said to be the age of skepticism, and so perhaps it is as regards religion, but its practical spirit inclines it to look favorably on everything that promises immediate benefit and it is always ready to give everything that seems useful a fair trial. The West especially has ever been open and cordial to all new ideas, and this may partly explain why Athlophorus, the sovereign remedy for rheumatism and neuralgia, has secured such a strong footing in Terre Haute. A well-known citizen who has the most implicit faith in it is Mr. R. Forster, the furniture dealer at No. 320 Main street. Mr. Forster, when recently asked at his wareooms as to the benefit he had derived from Athlophorus, answered as follows:

"Yes, I have used Athlophorus with the very best satisfaction. I have had neuralgia for many years, and could not find any medicine that would give me relief until I commenced using Athlophorus, and I can tell you I had used about everything."

"How did you first get confidence enough in Athlophorus to try it?"

"Well, it was just in this way. I was suffering very much at the time from my neuralgia. One Saturday evening Mr. Mallette, a manufacturer of wire mattresses, who is in business in Chicago, and lives at Elgin, Ill., came down to spend Sunday with me. Finding me suffering as I was he said

"Get some Athlophorus. It is good, my wife used it and was cured of her neuralgia by it."

"Without waiting for me to say much about it he went out and bought a bottle of the medicine. I took some that night and the next day I was as free from pain as if I had never had neuralgia. I spent several hours in a walk that Sunday with Mr. Mallette, which the day before would have been misery for me. During the summer months I am never troubled with neuralgia, but if I should be again I would certainly use Athlophorus, for I am fully convinced of its merits."

"I have recommended Athlophorus to several persons and have yet to learn of an instance where it did not accomplish its mission. Among others I recommended it to Mrs. Richards, who lives in Casey, Ill. I saw her in the city a few days ago and asked her if she had used it. She said that she had taken two bottles. It was helping her, and she said that she was going to get some more."

Mrs. C. A. Armstrong, of No. 123 South Second street, is another resident of Terre Haute, Ind., whom Athlophorus has cured.

"I used it for neuralgia," she says, "and it cured me. I had been troubled for about three years with what seemed at times neuralgia, and then again rheumatism. I was never free from pain. The very first dose of Athlophorus I took gave me relief, and after using only two bottles my soreness is all gone and I am feeling much stronger. My daughter was also cured of neuralgia by it."

"Yes, I can say Athlophorus did everything for me," is the daughter's statement. "I was so sick with neuralgia that I could not sit up and suffered the greatest pain. Mother sent me a half bottle of Athlophorus, the first few doses of which gave me relief. All I used was the half bottle and I have not had any neuralgia since."

If you cannot get Athlophorus or your druggist, will send it express paid, on receipt of regular price— one dollar per bottle. We prefer that you buy it from your druggist, but if he has none, we will be pleased to supply something else, but order it direct from us. Address ATHLOPHORUS CO., 112 Wall Street, New York

GENIUSES.

Are They Hard to Get Along With?

The doctrine has gone abroad that the marriages of geniuses are unfortunate. Mrs. Carlyle warned one of her friends against an alliance with a man of that sort, as however charming and fascinating he might seem in public, he was a hard person to live with. Her husband certainly gave her reason to think so, for he belonged to that brotherhood of distinguished Englishmen of letters whose domestic unhappiness is almost as famous as their works. Byron, Bulwer, Ruskin, Dickens, Carlyle, Thackeray—everyone of them unfortunate enough to have the romance and charm of life banished from their homes, and found only by the hearths and under the roofs of the fictitious families they created with their brains and pens. Add to this the irregularities of the marital relations of George Eliot and it is scarcely strange that anyone should imagine that a literary genius is a hard person to live with.

This difficulty may be due to several causes. The genius is generally very busy, and is supposed not to have much leisure for his family. The exhausting nature of his work sets his nerves to jarring, making him peevish and irritable. He is praised and flattered by the public until he feels the ties of domestic life to be irksome and its duties drudgery.

But the experience of distinguished literary men on this side of the Atlantic directly contradicts this idea that genius and domesticity are incompatible. So far from being unhappy the marriages of American literary men have been ideally happy. Fenimore Cooper was blessed with most noble and sympathetic wife, to whom he owed an inconsiderable degree of his literary success. The recently published journals and biography of Hawthorne show that the union of himself and wife was a case of love at first sight, the perfect unity and sympathy of which lasted until death parted them, and made their home a palace, as she herself called it in a letter to Longfellow, when referring to her husband's death, she spoke of it as "no longer a palace, since the King has left it." Longfellow's own home was another sanctuary where the intense burned to genius did not suffocate or intoxicate a loving heart. In no home in the world could there have been fonder affection and sweeter devotion than the busy scholar, author, and teacher found time to bestow upon wife and children.

Indeed, one cannot run over the list of American literary men without finding there tender fathers and affectionate husbands. Emerson, Holmes, Motley, Howells, Lowell, Warner, Mark Twain, Simms stand for all that is fine, pure, and peaceful in the domestic relations.

The reason for this difference between the distinguished literary men of the two countries is not easy to conjecture. It is all the less so, because it cannot be attributed as so many other differences are to the climate of the two countries. The moist and heavier climate of Great Britain is supposed to be soothing and placating in its influence; while the harsh dry climate of the United States has the disrepute of rasping the nerves and putting the whole system to a strained and tremendous tension.

Perhaps this difference in the lives of literary men is merely accidental. Perhaps it is due to the more pronounced American habit of difference to women and a more liberal acknowledgment of their individual liberty in judgment and conduct. American wives are more nearly coequal members of the matrimonial partnership. The man is less the head of the household, the woman allowed to order her own life and her children's lives more freely than is permitted to the English wife.

However that may be, the happy domestic experience of American literary men disproves the notion that a genius is hard to live with quite as emphatically as the unhappiness of distinguished Englishmen seems to prove it.—Detroit Free Press.

THE CALKER AND THE SHARK.
A Ship Calker who was at Work on a Staging had the Misfortune to fall into the Sea, and he had scarcely Struck the Water when a Shark put in an appearance and said:

"It was very Kind of you, Indeed, but you are such a Small Chap, you Know."

"I'll go Aboard and ask the Cook, who weighs Two Hundred Pounds, to come down in my Place, Answered the Calker.

"Thanks, and he needn't be at all Particular about his Tobacco-box or Boots."

When the Calker was safely Aboard he Mocked at the Shark, and a Tuna on a Rock pulled down his Vest and Solloquized:

A REMEDY FOR RHEUMATISM.

I've been doing nothing so long that I'm not much account. I tried pulling one end of a cross-cut saw to-day, and it made me blow like a porpoise. I had to get a substitute, and then I tried my favorite amusement of chopping with an axe, and I couldn't hold out long at that. I took a walk over the farm, and when I got back I tumbled down on the bed to rest, and Mrs. Arp asked me if I was sick. But I am going to keep it up until I get my wind back. Exercise is the best medicine in the world and the cheapest. My father said it was the best remedy for rheumatism he ever tried. When pains struck him bad he would get up and take a tramp over the farm, and would go in a walk or a fox trot, according to suffering.—Bill Arp, in the Atlanta Constitution.

In the Dear Old Days.

We differ in creed and politics, but we are a unit all the same on the desirability of a fine head of hair. If you mourn the loss of his blessing and ornament, a bottle or two of Parker's Hair Balsam will make you look as you did in the dear old days. It is worth trying. It is the only standard 50c article for the person to live with.

This difficulty may be due to several causes. The genius is generally very busy, and is supposed not to have much leisure for his family. The exhausting nature of his work sets his nerves to jarring, making him peevish and irritable. ROOF LIFE IN NEW YORK.

WHAT THE SUMMER BRINGS TO THE TOP IN THE METROPOLIS.

Flights Near the Sky—The City's Roof Gardens—Flowers, Music and Bright Lights on the Tops of Great Buildings. The Roof Sleepers.

Special Correspondence.

NEW YORK, June 13.—Summer develops a new phase of life in this city—life in the clouds, as it were, otherwise roof life. When the sun settles down behind the Jersey hills the interiors of the houses are deserted, and the roofs, as well as the streets, swarm with humanity divested of the shackles of labor and the leashes of care.

CUPID NEAR THE SKY.

The enjoyment that country people find on grass-covered lawns and wide porches, the people of New York, those who cannot seek "the rest, sure enough country," find on the flat roofs that shelter them from rain and storm. A bird's-eye view of the city in the early evening would reveal many an interesting scene, with a background of chimneys, water tanks, skylights and telegraph wires. There Cupid disports himself, for, like death, he has all places and all seasons for his own. Thither Melancholy goes to brood on her sorrows, and the solitary rooks to be still more solitary. And there, too, children laugh and romp and play.

As the heat of summer increases, the roofs are more and more utilized. When it is difficult to breathe inside, when canaries gasp and small dogs pant, the roof is the saving and restoring agent. Never is an evening in New York so stilling that a breath from the bay may not be caught on the roof, and the heated body gradually cooled to an endurable temperature.

Aside from the physical comfort to be found on the roofs of this great city, an exhilaration of spirit is to be had there. The altitude gives tinge of strength and power to the most despondent. The various, perplexing and even the sorrows of the lower world slip away as the eye rests upon the roofs that shut them out of sight. The same feeling comes as when one stands on a high mountain and looks down into the far off valley and wonders that its affairs and events could ever have the power to hurt or please. We shall know this feeling better, I fancy, in that day when we stand on the heights of immortality and look back over the long, hard road we now call life. Perhaps we shall then smile and wonder that we ever thought the way weary and difficult. Perhaps we shall then see that we were greatly led.

The roofs of New York are the home dormitories. The servants take the rugs and carpets there to be cleaned. The clothes are hung there to dry. The blankets and pillows are stored there. The domestic economy renews itself there in various ways. In the flat buildings or apartment houses, the roofs are divided off into little yards, well furnished with all appurtenances for the laundry when she reaches the point where air and sunshine are needed to finish her work of purification. Each family has its day to fill the roof space with its linon. In the evening its promonating capacity is free to all who want to make use of it.

Now here is a youth and his sweetheart. She lives in a cosy flat on the upper floor. Augustus and she slip away from the family, up the narrow back stairs, which in all nice apartment houses are kept as clean as a pin by the janitor and his assistants. There they sit and talk and plan, and exchange silly terms of endearment. They have something worth looking at, too, as the night comes on. The stars make a glorious illumination overhead; the moon, perchance, looks down and smiles in cold splendor, and the thousands and thousands of lights of the city sparkle and dance around them like monstrous jewels. Here and there a great white star among the countless yellow ones marks some park or great hotel, with its many-candled electric light. To the west the Hudson—or North river, as New Yorkers will call it—glimmers like a sheet of flame, lighted by the boats that glide on it like great water birds, and by the lights of the two great cities and the many towns that line its banks. And the long line of beautiful white lights that stretches eastward from the southeast corner of the city. This is the great Brooklyn bridge. The waters of East river that flow beneath it are never dark. It, too, reflects the lights of two great cities, and over its wide surface, on summer evenings, break up with light and merriment with music above the hum and roar.

ADVICE TO MOTHERS.—Mrs. Winslow's Soothing Syrup should always be used when children are cutting teeth. It relieves the little sufferers at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub wakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best known remedy for diarrhea, whether arising from teething or other causes. Twenty-five cents a bottle, Jan. 19-cadwal.

I. T. Michener, secretary of the republican state central committee, is a probable candidate for attorney general.

I think Ely's Cream Balm is the best remedy for catarrh I ever saw. I never took anything that relieved me so quickly and I have not felt so well for a long time. I used to be troubled with severe headaches two or three times a week, but since using the balm have only had one and that was very light compared with the former ones.—A. J. Alcorn, agent U. P. that it might well be mistaken for some monstrous castle stuck down among several hundred smaller ones. A sight of New York from its roof at night is something to be remembered and quite unequalled.

Some of the hotels have regular roof gardens. A tiled floor is put down over the roof, flowers border the edges, chairs and tables are permanently placed there, which are regularly dusted off and set in order every evening; electric lights blaze there, and the roof garden is lighter than daylight and cooler than the sensible. Men read newspapers there, romantic girlsavour novels set in nautical type, and ladies who have a passion for wearing out their eyes and wasting their time in fancy work continue it on the roof. Sometimes there are social games of cards played there; sometimes very spirited discussions go on.

All the world has heard of the Casino, with its roof garden and buffet. There, among flowers, ladies and gentlemen promenade and eat and drink to the sound of delicious music, feeling that the real city is far, far below them, too far to remember it and its cares and worries. High as the Casino's roof is, the Normandy hotel, a square south of it, is still higher. It, too, has a roof garden, but only for its guests.

Another and contrasting phase of roof life may be seen in the lower part of the city when the midsummer evenings come. The poor, the very poor, who are huddled together in hot and dingy rooms, take their mattresses and pillows to the roof and sleep there. Pedestrians who come from Brooklyn on the bridge at 4 o'clock in the morning can see the roof-sleepers spread out over the miles of flat roof like corpus after a battle.

The sight is almost as pathetic. They are hard workers and ought to have the decent comforts of life. Instead, they have the burden of its discomforts. The roof-sleepers of New York are a sight to make an angel weep. Occasionally a man

is generally used in the South to arouse the *Top Liver* to a healthy action.

For all diseases in which *Top Liver* is needed it will give the most rapid and certain results.

or a child, or perhaps a woman, rolls off the roof and is found the next morning with lifeless body and a broken skull.

The sun warms them, and they drag their wearied limbs below long, long, over the prosperous world opens its eyes. They eat their poor food in semi stemming little ovens, and are off to work while the city is still held in the dusk of the night. Poor as their roof lodgings are they would gladly remain there longer, but the task of need is ever upon them, goading them into the service of toil, that they may escape the clutches of want. And so the roofs of New York do but reflect the kind of life they shelter.

The Lafayette oil well, at noon yesterday, had reached a depth of 165 feet. No rock or boulders have as yet been encountered. The blue clay through which they are boring is so soft, and its good effects so sure, that nothing else, except good nursing, are needed in a great majority of cases. Buy it, try it, and afterwards it will not require any praise from us.

The wheat harvest will commence
several days earlier than usual this year.
A number of farmers expect to com-
mence cutting wheat by the last of next
week. The wheat crop was never better
in this part of Indiana than this year.
The oats, grass and barley crops are also
annually good. Potatoes promise an
immense yield, and corn is coming on
most promisingly. Apples also yield
heavily. The harvests in foreign coun-
tries are good and there is likely to be
but little demand for our grain abroad.

large number of visitors from abroad,
including members of the Chicago press,

his headquarters from Peru, Ind., to De-

Smart and Professor Smith had become

so strained that the absence of one of
them was absolutely necessary. A pa-
per has been signed by about fifty alum-
ni and as many students, demanding the
retention of Prof. Smith, but the action
of the board of trustees is not likely to
be rescinded.

Nineteen students have signed a paper declaring
that they will not return if Prof. Smith is not re-
tained.
